

BREAKING NEWS

7th January 2025 – SLOVENIA JOINS NORTH

SLOVENIA became the 20th country to join NORTH demanding an immediate suspension of COVID-19 modified mRNA vaccines. The letter was sent today to the Prime Minister Dr. Robert Golob and Minister for Health Dr. Valentina Prevolnik Rupel.

25th November - An international group of politicians and leading medical and other professionals wrote to the heads of state of 10 European countries (Denmark, Estonia, Finland, Greenland, Iceland, Latvia, Lithuania, Norway, Sweden, and the United Kingdom) calling for immediate suspension of COVID-19 modified mRNA vaccines citing serious health concerns.

8th December - Czech Republic, Ireland and Portugal,

17th December - Hungary, Malta and Spain,

27th December – Belgium and Croatia,

31st December – The Netherlands joined the NORTH Initiative.

With over 600 international signatories, citizens from other European countries are preparing to join NORTH in the coming weeks.

The letter from NORTH states:

- Scientific evidence shows that it was a lottery as to which batch a person received and the side effects – including death - they experienced.
- COVID-19 vaccines were never tested for their ability to block transmission. Thus, medical product regulators, as well as government agencies, misinformed and even misled the public when coercing them into accepting these products.
- Multiple independent analyses have shown that modified mRNA vaccines contain variable but alarmingly high levels of residual DNA. This raises extreme concerns about the risks to human health and the potential for genetic damage that were not accounted for scientifically in the authorization process.

The call has unprecedented international support and demands:

- *An immediate halt to the use of modified mRNA vaccines.*
- *An independent and transparent investigation into their approval and use.*
- *Scientific evidence that shows that there is no risk of damage to human DNA.*

Please share. MSM has declined sharing our previous press release due to editorial policy.
